Essays in Medical Sociology Renée Claire Fox This outstanding collection of essays by Renee C. Fox encompasses almost thirty years of original, pioneering research in the sociology of medicine. Based on fieldwork in a variety of medical settings in the United States, Belgium, and Zaire, these ethnographic essays examine chronic and terminal illness, medical research, therapeutic innovation, medical education and socialization, and bio-ethics. Within this framework, three empirical "cases" have been singled out for special scrutiny--the process of becoming a physician, the development of the artificial kidney machine and organ transplantation, and the evolution of medical research in Belgium. Without ignoring social structural or psychodynamic factors, Dr. Fox has explored basic cultural phenomena and questions associated with health, illness, and medicine: values, beliefs, symbols, rites, and the nuances of language: ethical and existential dilemmas and dualities; and the complex interrelationships between medicine, science, religion, and magic. She draws systematically and imaginatively upon anthropological, psychological, historical, and biological insights and integrates observations and analyses from her own studies in American, Western European, and Central African societies. This second, augmented edition includes Professor Fox's more recent contributions to the expanding field of the sociology of medicine. They are "The Evolution of Medical Uncertainty; The Human Condition of Health Professionals; Reflections on the Utah Artificial Heart

Program; Is Religion Important in Belgium?; Medical Morality is Not Bioethics"--"Medical Ethics in China and the United States; "and "Medicine, Science and Technology. "The work also includes a new introduction, "Endings, Beginnings and Continuities." Now, anthropologists, sociologists, medical educators, scientists, researchers, and students can join her on her "journeys into the field" and share with her the priceless insights to be gained from the physicians, nurses, medical students, patients, and their families, who are working, living, and dying on the edge of what is known, scrutable, and remediable--on the edge of medical science.

Selected Essays on George Gascoigne Gillian Austen 2022-08-30 This collection of essays situates George Gascoigne in context as the pre-eminent writer of the early part of Queen Elizabeth's reign. His ceaseless experimentation was hugely influential on those later Elizabethans - including Spenser, Sidney and Shakespeare - who represent the great flowering of the English literary renaissance. Gascoigne rarely returned to a genre, writing prose fiction, blank verse, plays, sonnets, narrative verse, courtly entertainments, satire and many other literary forms, and the later Elizabethans were fully aware of his significance. These essays are organised into three main sections: influences upon Gascoigne, such as Skelton; Gascoigne's influence on others, including Spenser; and finally a reassessment of his critical neglect and the story behind his marginalised status in the English literary canon. As only the second multi-authored essay collection on Gascoigne, this book makes a valuable contribution to our understanding of this important and often misunderstood writer.

Landmark Essays on Writing Centers Christina Murphy 2013-10-18 This collection introduces the reader to the ideas that have shaped writing center theory and practice. The essays have been selected not only for the

insight they offer into issues but also for their contributions to writing center scholarship. These papers help to chart the legitimation of writing centers by providing both a history and an examination of the philosophies, praxis, and politics that have defined this emerging field. They demonstrate the ways a clearer profile of the discipline has emerged from the research and reflection of writers, like those represented here. This volume charts the emergence of writing centers and the growing recognition of their contributions, roles, and importance. As a nascent discipline, writing centers reflect the concerns with marginality and with finding a respected place in the academy that characterize any new field of academic inquiry, practice, and research. Concomitantly, professionals in these fields seek standing within the academy and a way of defining and validating their contributions to the educational process. Contemporary writing center theorists look to interdisciplinary and multidisciplinary investigations to interpret the work they do and to clarify their aims to the academy at large. Their work employs a variety of philosophical perspectives -- ranging from sociolinguistics to psychoanalytic theory -- to show the complex nature and potential of writing center interactions. The idea has now become the multidimensional realities of the writing center within the academy and within society as a whole. What its role will be in future redefinitions of the educational process, how that role will be negotiated and evaluated, and how professionals will shape educational values will constitute the future landmark directions and essays on writing center theory and practice.

Identity Papers Bronwyn T Williams 2006-09-30 How do definitions of literacy in the academy, and the pedagogies that reinforce such definitions, influence and shape our identities as teachers, scholars, and students? The contributors gathered here reflect on those moments when the dominant cultural and institutional definitions of our identities conflict with our other identities, shaped by class, race, gender, sexual orientation, location, or other cultural factors. These writers explore the struggle, identify the sources of conflict, and discuss how they respond personally to such tensions in their scholarship, teaching, and administration. They also illustrate how writing helps them and their students compose alternative identities that may allow the connection of professional identities with internal desires and senses of self. They emphasize how identity comes into play in education and literacy and how institutional and

cultural power is reinforced in the pedagogies and values of the writing classroom and writing profession. *"Leading from the Middle," and Other Contrarian Essays on Library Leadership* John Lubans 2010 Argues for proactive, rather than reactive, democratic library organizations with shared leadership and decision making by leaders and followers.

Essays and Surveys in Global Optimization Charles Audet 2005-12-05 Global optimization aims at solving the most general problems of deterministic mathematical programming: to find the global optimum of a nonlinear, nonconvex, multivariate function of continuous and/or integer variables subject to constraints which may be themselves nonlinear and nonconvex. In addition, once the solutions are found, proof of its optimality is also expected from this methodology. Therefore, with these difficulties in mind, global optimization is becoming an increasingly powerful and important methodology. Essays and Surveys in Global Optimization is the most recent examination of its mathematical capability, power, and wide ranging solutions to many fields in the applied sciences.

A+ Guide to Narrative Essays Alison Plus 2015-07-07 "Just tell a story," the teacher said. "It will be fun." Yet the student stares at a blank screen, uncertain what to write, and it's far from a fun experience. The narrative essay -- a personal form of storytelling about true experiences -- requires the writer to abandon familiar tools such as topic sentences, thesis statements, and supporting authority. But this doesn't mean the writer should just type words until the pages are filled. Rambling freeform narratives are not what most writing instructors hope to see. There is a better method, and it can be found in this short booklet. This booklet explains everything the writer needs to generate a successful narrative essay in step-by-step fashion. Starting with a story goal, proceeding through a

timeline, and finishing with two targeted paragraphs, this booklet will turn a blank screen into a finished paper. Table of Contents How to Use This Booklet What is a narrative essay? Special Note Regarding Use of the Word "Narrative" Assignment Analysis: beginning, middle, end: outline the event on a timeline Thesis: the Goal Beginning: the Setup -Premise/Theme -Characters -Your point of view Middle: Events on a timeline -Action - Dialogue -Description A Special Note About Paragraphing A Special Note About One Exception to the Timeline A Special Note About the Second-to-Last Paragraph End: the Resolution: how you changed/how things changed Proofreading Here's what students have said about this method: "This made it all seem really easy." "I thought I should just write about what happened. If I had done that, I would have left out some important things. Thanks for showing me what was missing!" "Whew! I tried this, and wrote my paper in record time!"

Games, Sports, and Play Thomas Hurka 2019-08-29 This volume presents new philosophical essays on a topic that's been neglected in most recent philosophy: games, sports, and play. Some contributions address conceptual questions about what games and sports have in common and that distinguishes them from other activities; here many take their start from Bernard Suits's celebrated analysis of game-playing in his book *The Grasshopper* and either elaborate it or propose an alternative to it. Other essays discuss normative issues that arise within games and sports, such as about fairness, for example in the treatment of male and female athletes. Yet others consider broader evaluative questions about the value of games and sports, which some see as enabling the display of distinctive excellences. *Games, Sports, and Play* includes a posthumous essay by Suits defending his claim, in *The Grasshopper*, that life in utopia would consist primarily in playing games. The volume's chapters approach the topic of games, sports, and play from different angles but always in the belief that there is rich terrain here for philosophical investigation.

ESSAY: The Creativity Debate: Talent or Practice - What Matters More? William Van Zyl 2018-06-01 Every day millions upon millions of children and students attend schools and educational centres all over the world. They go to school with expectations to learn something new, to get a new experience and most of all to express and celebrate their uniqueness. Do their teachers think about their creativity? On the creativity continuum,

there are two extremes "he or she is born creative, gifted and talented" on the one end, and on the other end is "he or she has been exposed and trained by very smart parents and teachers". Read about one of the theories - the "systems approach" - which originated from Positive Psychology and according to Csikszentmihalyi (1999a). The 'flow' state is an optimal state of intrinsic motivation. This essay considers and discusses the creativity debate. The author considers creativity (education) in a New Zealand context. He continues to consider his practice as a Design and Visual Communication teacher. APA referencing included (academic paper). An easy read!

Bright Epoch Andrea G. Radke-Moss 2008-01-01 With the passage of the Morrill Act in 1862, many states in the Midwest and the West chartered land-grant colleges following the Civil War. Because of both progressive ideologies and economic necessity, these institutions admitted women from their inception and were among the first public institutions to practice coeducation. Although female students did not feel completely accepted by their male peers and professors in the land-grant environment, many of them nonetheless successfully negotiated greater gender inclusion for themselves and their peers. In Bright Epoch, Andrea G. Radke-Moss tells the story of female students early mixed-gender encounters at four institutions: Iowa Agricultural College, the University of Nebraska, Oregon Agricultural College, and Utah State Agricultural College. Although land-grant institutions have been most commonly associated with domestic science courses for women, Bright Epoch illuminates the diversity of other courses of study available to female students, including the sciences, literature, journalism, business commerce, and law. In a culture where the forces of gender separation constantly battled gender inclusion, women found new opportunities for success and achievement through activities such as literary societies, athletics, military regiments, and women's rights and suffrage activism. Through these venues, women students

challenged nineteenth-century gender limitations and created broader definitions of female inclusion and participation in the land-grant environment and in the larger American society.

Moral Problems in Higher Education Steven M. Cahn 2021-04-16 Moral Problems in Higher Education brings together key essays that explore ethical issues in academia. The editor and contributors - all noted philosophers and educators - consider such topics as academic freedom and tenure, free speech on campus, sexual harassment, preferential student admissions, affirmative action in faculty appointments, and the ideal of a politically neutral university. Chapters address possible restrictions on research because of moral concerns, the structure of peer review, telling the truth to colleagues and students, and concerns raised by intercollegiate athletics. Cahn selects two key readings in each are to offer a readable introductory guide to these critical subjects for students studying academic ethics and higher education policy. In addition to the selections and a general introduction, Cahn provides study questions for use in the classroom.

Essays In Decision Making Mark Mark 2012-12-06 The
pioneering study by Bowman [1980) reawakened interest in
risk and return relations in the strategic management
literature. We do not examine this literature here
because we have elsewhere reviewed it in detail 1 and
because, for the most part, these studies have been
confined to ex post data. Discussions of the strategies
which subjects used to direct their ex ante evaluations
of risks and returns have either been omitted or else
have been only indirectly inferred from ex post data. In
addition, with few exceptions, this literature does not
attempt to ascertain the meanings that might have been
assigned by subjects to terms like "risk" and/or the
"returns" with which they have been concerned. Even
fewer of these studies have attempted to ascertain how
the subjects implemented their definitions en of
prospective strategies. Thus, tuis literature may route
to arriving at evaluations best be regarded as bearing
only indirect relations to the present study which is

concerned not only with the meanings assigned to terms
like "risk" and "return" but also with how these terms
are used in arriving at risk and return evaluations of
proposed strategies as well as how they are measured and
used, on an ex ante basis en route to seeing how these
evaluations match with ex post performance. In a sense,
one part of this study--i. e.

2003-09-15 This book examines the manner in which
successful firms develop, transfer, protect, and capture
value from technological innovation. In essence, it is
about "knowledge management", which lies at the
foundation of firm level competitive advantage in
today's global economy. The essays contain some of the
fundamental contributions to the field of knowledge
management by one of its best-known thinkers; they also
constitute an immensely practical guide for those
managers who wish to look below the surface of what is
going on in Silicon Valley and elsewhere.

the economics of R and D and technological change. As
appreciation and remembrance for his scholarly
contributions, eminent scholars have contributed
original papers for this edited volume. The authors have

Writing Exploratory Essays; From Personal to Persuasive Thinking Against the Grain Rodger Beehler 2007 This work is a connected series of essays on morality, education, law, and society. All of the essays indeed "think against the grain," challenging some of the dominant thinkers and fashions of our time in a strikingly original and penetrating way. They force the reader to consider our hegemonic values, how we are to live our lives and view our world. Political theorists, social scientists, philosophers, educators, legal scholars, and cultural and literary theorists will find them profitable to study. While the book meets the standards expected by such scholars, its essays are written in a lively and accessible manner, which also makes them of interest to the general educated public. Written by the late Dr. Rodger Beehler, this work imparts the wisdom and insights of writers who instruct and amuse the reader on matters of our predominant values.

How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty and participate on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general.

Essays and Surveys in Metaheuristics Celso C. Ribeiro 2012-12-06 Finding exact solutions to many combinatorial optimization problems in business, engineering, and science still poses a real challenge, despite the impact of recent advances in mathematical programming and computer technology. New fields of applications, such as computational biology, electronic commerce, and supply chain management, bring new challenges and needs for algorithms and optimization techniques. Metaheuristics are master procedures that guide and modify the operations of subordinate heuristics, to produce

improved approximate solutions to hard optimization problems with respect to more simple algorithms. They also provide fast and robust tools, producing high-quality solutions in reasonable computation times. The field of metaheuristics has been fast evolving in recent years. Techniques such as simulated annealing, tabu search, genetic algorithms, scatter search, greedy randomized adaptive search, variable neighborhood search, ant systems, and their hybrids are currently

among the most efficient and robust optimization strategies to find high-quality solutions to many real-life optimization problems. A very large number of successful applications of metaheuristics are reported in the literature and spread throughout many books, journals, and conference proceedings. A series of international conferences entirely devoted to the theory, applications, and computational developments in metaheuristics has been attracting an increasing number of participants, from universities and the industry.
